

INTRODUCING THE

Berner PureAir Package™

patent pending

Deactivates viruses, kills bacteria
and mold spores at the door.

Improves Indoor Air Quality (IAQ)
of the space.

Quiet and energy efficient.

Saving energy and creating healthy, comfortable environments.

When the doors are open,™ BERNER AIR CURTAINS

The Berner PureAir Package™ air purifier system for air curtains

Custom Colors,
& Stainless Steel Available

Electric, Steam or Hot Water Heat Available

What is NPBI?

Also known as cold plasma, needlepoint bipolar ionization technology (NPBI) is an ozone free technology that ionizes air molecules.

How does it work?

Ionized air molecules or free radicals are mixed into the air, breaking down gases such as VOCs & odors. The positive and negative ions also pull hydrogen out of viruses, bacteria and mold, killing them.

Kills:

- Germs, viruses and bacteria
- Mold

Eliminates / Reduces:

- VOCs
- Allergens
- Odors
- and other particulates

available for the Architectural High Performance 10 Series #AHD10

- **When the door is open**, pass through an air stream filled with carcinogen-free ionized air molecules.
- **When the door is closed**, the EC motor powers down to the "PURE" setting to quietly operate at a very low speed as an air purifier for the space.

Standard Construction

Berner PureAir Package

- MERV 8 filter (washable)
- Needlepoint Bipolar Ionization (NPBI) technology
- 1/2 hp EC motor(s) - ten speeds
- Intelliswitch with the PURE mode

NPBI is certified by UL 867 and UL 2998 as an ozone and byproducts free technology

Architectural High Performance 10

- 12 1/4" high X 21 1/4" deep
- Factory installed Intelliswitch digital controller
- Clear satin anodized aluminum exterior (Optional: Custom Color or Stainless)
- Wall & Top Mounting
- High efficiency, low noise Pro-V Nozzle
- Optional: Berner Air (Built-in wireless controller + app)

for indoor use
